## OBJECTIVE

Experienced MERN Stack Developer seeking full-time and intern roles. Skilled in delivering quality work, Adaptable,detail-oriented, and passionate about problem-solving.

## Education

**DY Patil University**                                                             **Sep. 2021 – May 2025**
*Bachelor of Science in Computer Science*                                               *CGPA - 9.7*

**SIES high school**                                                                **Sep. 2019 – May 2021**
*Higher Secondary School*                                                            *90 percentage*

## Technical Skills

| | |
|---|---|
| **Programming Language** | C, Java, Javascript, Typescript, Python |
| **Frameworks/Libraries** | Reactjs, Nextjs, Nodejs, Expressjs , Etherjs,Tensorflow ,opencv |
| **DataBase** | MySQl, MOngoDB |
| **Others** | Postman, API,UI/UX |

## Experience

**ACM-RAIT**                                                                       **Dec 2022 - Jan 2023**
*Web Development Intern*

- Learned about many javascript framework , and i have built many small
- Acquired practical skills for web development career.

## Projects

**Veriface** | *A DeepFake Detection Web App*                            **October 2023 — (Try it here)**

- Created a system that can spot fake videos with **75% accuracy**, making it a reliable tool to identify edited content
- Designed a web app with **React** frontend integrated it with **Flask** backend and **Tensorflow** CNN/GAN Model
- The model identifies deepfakes using features like **face masking**, **lip syncing**, and **eye blinking**. It's trained with a dataset of 4000+ videos from **Faceforensics++**.
- Made a user-friendly frontend with fun **deepfake game**s and clear explanations on how our system spots fake videos

**Meta-Tunes** | *A Stylish Music Player App*                               **June 2023 — (Try it here)**

- Designed an engaging **MERN and Firebase**-based music app with a user-friendly interface for seamless music discovery and personalization.
- Enabled secure user authentication, real-time database management, and efficient file storage through Passportjs.
- Highlighted trending songs and **dynamic playlists** to enhance music exploration and user engagement.

**Students Attendance System** | *Attendance using face Detection*          **December 2022 — (Try it here)**

- Developed an efficient face detection and recognition system using **OpenCV**, allowing seamless and accurate **attendance management**.
- Integrated **OpenCV** and **face recognition** libraries to create a robust attendance system, ensuring secure and automated record-keeping.
- Facilitated **automatic attendance tracking** with real-time **face recognition**, providing a convenient and precise solution.

## Extracurricular

- Build a project called **No-Dues-Project** with MERN Stack this project is associated with my College and is currently **operational** in **college server**.
- more than 400 Leetcode solutions , solved various data structures
- Volunteered in RAIT tech-fest 2023
- Cleared Round 2 in TVS Credit hackathon.
